Experienced backend developer intern with expertise in .NET, SQL Server, and RESTful APIs. Has demonstrated the ability to develop and optimize database-driven applications. I am excited to apply my skills in creating robust and scalable applications.

SKILLS

Tech Stacks: C#, .NET, C, Java, Springboot, MySQL, SQL Server

Soft Skills: Teamwork, Time management, Adaptability, Problem-solving

PROJECTS

Employee Management App [↗](#)

Jun 2024 - Jul 2024

- **Summary:** The Employee Management App is a comprehensive tool designed to streamline the management of employees within an organization. This application supports functionalities such as managing employee details, roles, and departments, with a focus on providing a user-friendly interface and secure authentication.
- **Technology:**
 - **Frontend:** Windows Presentation Foundation (WPF)
 - **Backend:** C#
 - **Database:** SQL Server
 - **IDE:** Visual Studio
- **Responsibilities:** This project was entirely developed by me. Responsibilities included:
 - Designing and implementing the user interface using WPF.
 - Developing the backend logic and services in C#.
 - Setting up and managing the SQL Server database.
 - Implementing authentication and authorization mechanisms.
 - Documenting the code and project structure.

Web booking yacht [↗](#)

May 2024 - Jul 2024

- **Summary:** The online yacht booking website uses the main programming language Java Spring Boot, with the front end developed in JavaScript and SCSS. The website serves three main actors: Admin, company, and customer. Customers can view yachts, create login accounts, book yachts, and pay online via VnPay. Companies can manage yachts, rooms, and services, while admins manage all user accounts.
- **Technology:**
 - **Backend:** Java, Spring Boot
 - **Frontend:** ReactJS, SCSS, Bootstrap, Redux
 - **IDE:** Visual Studio Code, IntelliJ
- **Team size:** 5 members
- **Responsibilities:**
 - Created and designed the project database using MySQL.
 - Developed backend API including account management, booking order management, payment API creation, bill management, and schedule management.
 - Supported interface coding for schedule management and booking order management.

Shoes shop [↗](#)

Feb 2024 - Mar 2024

- **Summary:** Website selling shoes for Viet Sneaker store with a simple interface, easy to operate and manage for admins and customers. The website has main functions such as product viewing, registration, login, shopping cart, and payment. Admins can manage products and user accounts.
- **Technology:**
 - **Frontend:** HTML, CSS3
 - **Backend:** Java
 - **Database:** SQL Server
 - **IDE:** Apache NetBeans
- **Responsibilities:** This project was entirely developed by me. Responsibilities included:
 - Frontend and backend programming using Java MVC.
 - Database design and management using SQL Server.
 - Designing the user interface with HTML and CSS3

EDUCATION

Not graduated

Jan 2021 - Dec 2025

FPT University

GPA: 7.994 of 10.0

Excellent student Summer 2023 semester

Excellent student Spring 2024 semester

LANGUAGES

English (Limited working proficiency) • **Japanese** (Limited working proficiency)
